

Notice to Huron East Residents

The Municipality of Huron East does not go door to door for water testing or product sales. We do not hire or authorize outside agencies to visit your home or business for the purpose of testing your water on our behalf.

The Huron East water systems are tested weekly for bacteriological analysis.

Chlorine residuals are analyzed continuously and the data is inspected by the Ministry of the Environment, Conservation and Parks on an annual basis.

Huron East's Water and Sewer Operators drive vehicles clearly marked with the Huron East Name or JACOBS.

If you are unsure, please ask to see their identification or contact the Municipal Office at 519-527-0160.

Shawn Bromley
Director of Public Works
