Ag-film Recycling Program

[Download a flyer](#)

[Flyer](#)

Switch Energy has established an Ag-film, Boat wrap and Pallet shrink wrap recycling program.

We will be supplying large plastic bags to our Ag Recycling Partners for bundling. This allows for ease of handling, segregating and prevent contamination. The benefits of recycling are well known. Here is another opportunity for us to work together to protect the environment and assist in reducing future costs of the raw material.

Our role in the program

We will be collecting, cleaning and conditioning the used film so that it can be reintroduced back into the plastic industry.

How to become a participant

Contact Don Nott at 519-524-0193. For **email** click the button at the top of the page
